

The **MAJOR HOME CINEMA** is an electric screen dedicated to the Home Theatre market but also in A/V Professional in prestigious meeting rooms. It is manufactured, as a standard, with black side borders, a black top drop 30 cm. high (customizable), a black bottom border and a black dowel bar. Thanks to the borders all around, the image will be perceived as sharper to the spectator's eye.

Available in 4:3, 16:9 and 16:10 ratios or **bespoke sizes**.
