

## WALL MOUNTED REMOTE CONTROL PAD (868MHz)

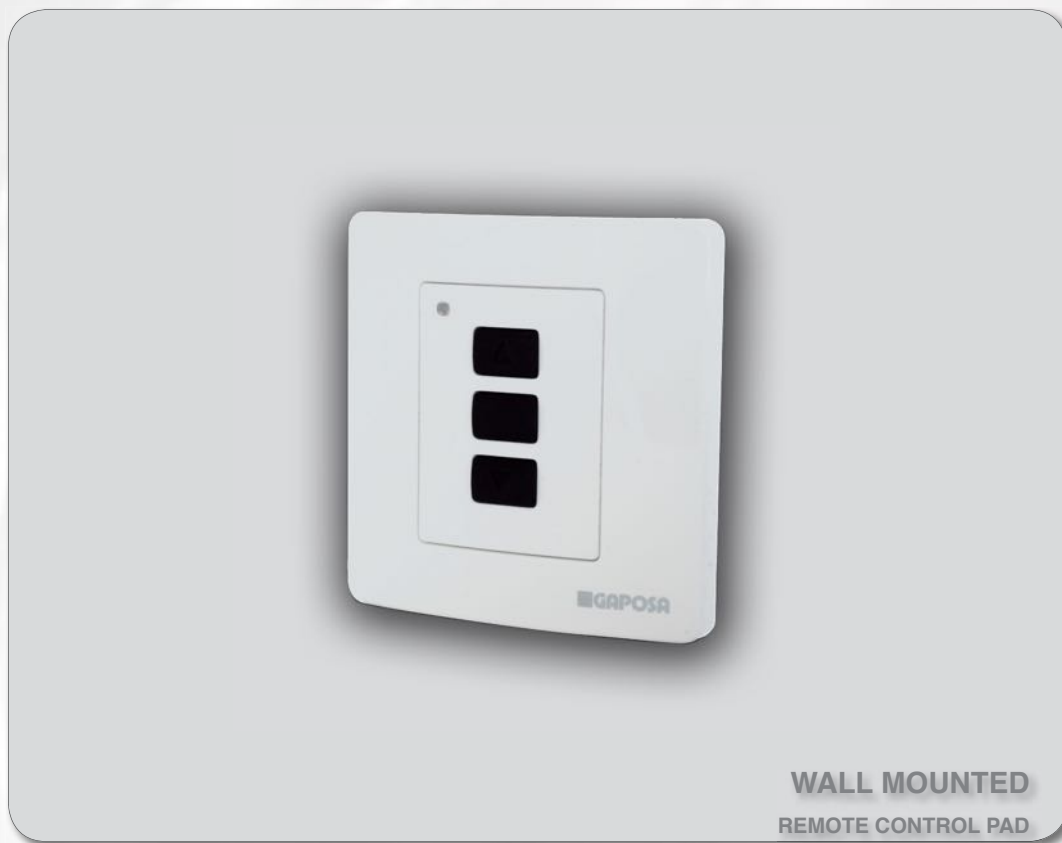

The **WALL MOUNTED REMOTE CONTROL PAD** can be used in addition to the handheld remote (either external or integrated version).

The article is supplied with a bezel which should be mounted on the wall, its purpose is to insert the pad inside it.

It is an RF transmitter operated by batteries so that the bezel can be installed everywhere inside the room without cabling.

It can be useful as a second transmitter in case of exhaust batteries or loss of the first remote.

Pad and bezel will be standard supplied in white.

Dimension: **80x80x14 mm (WxDxH)**

**EUROSCREEN S.r.l.**
